Natural Stone Work

A true work of art

Catalogue

rachid slimani

Natural Stone Work

Natural stones shaped by the force of nature and transforming into thousands of colors. In each piece we can appreciate the passage of time, millions of years in each vein, in each cut, are a combination of "Time and Nature" in which all the effects of the nature in which they exist are reflected and in which we can appreciate almost all the movements of art and architecture. At Rachid Slimani company we transform this beauty of nature into unique and unrepeatable art so that each project becomes works of art in themselves.
